# STAY SAFE WITH OUR CRANE OPERATOR COURSES

Today's vehicle-mounted cranes are remarkable pieces of equipment with immense lifting and positioning capabilities. Their power, combined with the size and scope of the vehicles on which they are mounted, calls for specialist operator knowledge to ensure compliance with current health and safety regulations and operating procedures.

## Our place or yours

Palfinger UK's regular training courses can take place either at our new Devizes, Bradford or Falkirk Training Academies, or on your own premises. Our day-to-day involvement with lorry crane installations and servicing gives our experts the knowledge to ensure that the content of our courses is always up to date, covering obligations under the Health and Safety at Work Act 1974 as well as all new legislation.

Courses are run by our Palfinger-trained professionals who have also completed the ALLMI Instructor course. All Courses are certified by ALLMI (the Association of Lorry Loader Manufacturers and Importers) and are recognised by the Health & Safety Executive.

## Courses

We offer three main courses:

- Lorry Loader Operator
- Slinger/Signaller
- Conversion courses

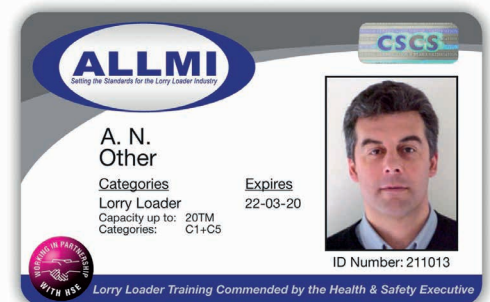

Additionally we provide a one-day management course for those who manage crane operatives. On most courses for a small registration fee we can also register each of your delegates for seven hours qualifying time towards Driver CPC training (Certificate of Professional Competence).

Contact us today for all the details.
