ON-SITE COMMERCIAL VEHICLE BODY REPAIRS

It's an unavoidable fact that due to the environments in which they operate commercial vehicles are susceptible to body damage. Whilst it's important to maintain vehicles in a good, safe condition, the situation everyone wants to avoid is having the vehicle out of action for extended periods while it is sent for repair.

It was to help operators maintain their vehicles in prime condition and minimise down-time that we launched a mobile body repair service in 2015, which has proved extremely popular and effective.

Specially-equipped vans are in service, with trained operatives who will carry out on-the-spot repairs at times to fit in with your schedule.

The mobile facility with its workshop tools and extensive stock of parts is capable of undertaking a surprising range of repairs including dropside, side impact protection, rear under run and floors. All vehicles are fitted with on-board generators and welders capable of all site welding, including aluminium.

Routine body inspections can also be carried out on-site and estimates can be provided for all repairs.

To find out more about our on-site commercial vehicle repair service call us on **01380 722381**, then select 1 for Service, 2 for Breakdowns and Defects, 2 for Body Repairs, or visit our website, palfinger.co.uk.

Our national mobile service covers the whole of mainland UK
