

ON-SITE COMMERCIAL VEHICLE BODY REPAIRS

All body repairs undertaken:

- Floor, dropside & curtain repairs
- Fall arrest systems
- Body inspections
- Mobile welding

ON-SITE COMMERCIAL VEHICLE BODY REPAIRS

It's an unavoidable fact that due to the environments in which they operate, commercial vehicles are susceptible to body damage. Whilst it's important to maintain vehicles in a good, safe condition, the situation everyone wants to avoid is having the vehicle out of action for extended periods while it is sent for repair.

It was to help operators maintain their vehicles in prime condition and minimise downtime that we launched a mobile body repair service in 2015, which has proved extremely popular and effective.

Specially-equipped vans are in service, with trained operatives who will carry out on-the-spot repairs at times to fit in with your schedule.

The mobile facility with its workshop tools and extensive stock of parts is capable of undertaking a surprising range of repairs on Dropside, Curtain Side, Flatbed and Box Vehicles. All vehicles are fitted with on-board generators and welders capable of all site welding, including aluminium and coded welding.

Routine body inspections can also be carried out on-site and estimates can be provided for all repairs – a valued service prior to MOT's to ensure the body work is safe and compliant.

To find out more about our on-site commercial vehicle repair service, call: **01380 733513** selecting Option 3. Alternatively, you can email us at: bodyenquiries@thwhite.co.uk or visit our website at: palfinger.co.uk
